Itinium Battery Collections Portal — QA Test Plan

Prepared July 2026 · All test accounts use the shared password below

Login Credentials

Password for all accounts: password123

Role	Email	Name
Head Office Admin	admin@itinium.co.uk	Sarah Mitchell
Accounts	accounts@itinium.co.uk	Rachel Adams
Accounts (2nd)	l.chen@itinium.co.uk	Lisa Chen
Team Leader (Linde)	team@itinium.co.uk	Sarah Cooper
Depot User (Linde South East)	depot@itinium.co.uk	Dave Mitchell

1. Authentication (all roles)

- & Log in with each account; confirm each lands on the correct home page (depot user !' depot dashboard, others !' admin dashboard)
- & Attempt login with a wrong password — should be rejected
- & Use "Forgot password" to request a reset and complete the reset flow
- & Log out and confirm you're returned to the login page
- & Try to open a restricted URL directly (e.g. /schedule as a depot user) — should be blocked/redirected

2. Depot User (depot@itinium.co.uk)

Dashboard

- & See welcome message and "New Collection" quick action
- & Saved drafts appear; resume a draft and delete a draft

Collection Form (main feature)

- & Create a new collection: add battery rows with pallet no., asset no., serial, manufacturer, cell type/cell model, voltage
- & Confirm the serial box is a plain optional field — no "Serial unknown or damaged?" flag appears (recent change)
- & Confirm there is no Safe Load box on the form (recent change) but the CURRENT LOAD total bar still updates as rows are added
- & Type an unknown manufacturer — expect an amber suggestion/flag with option to accept or confirm
- & Select voltage "Other" and enter a custom voltage
- & Loose cells: tick loose cells, enter Cell Type + Cell Qty; try submitting without them — expect a clear error
- & Clone a battery row; delete a row
- & Attach a row photo; remove it (photo should be optional)
- & CSV import: download the template, fill rows, import. Check:
  - %æ Manufacturer names auto-match (e.g. lowercase still matches)
  - %æ Voltages like "24", "24v", "24 V" become 24V; odd values (e.g. 72) import as Other + custom (recent change)
  - %æ Rows with missing serial/asset are flagged in the review dialog
- & Save as draft mid-way, leave, and resume it
- & Submit below minimum tonnage — expect a block; add rows until above minimum and submit successfully

Stillages / Settings / Help

- & Log a stillage movement (Collected / Dropped Off) and check stock levels update

- & Update profile and notification preferences in Settings
- & Read the User Guide (check the table of contents scrolls to sections) and submit a support ticket with a screenshot

3. Team Leader (team@itinium.co.uk)

- & Dashboard shows stats and recent jobs for their client only (Linde)
- & View jobs list; open a job detail — confirm read-only depot info and flagged rows show correctly
- & See depot users' saved drafts
- & Locations: add/edit a location for their client
- & Users: create a new depot user for Linde; confirm they cannot see/manage other clients' users
- & Submit a collection themselves via the collection form
- & Stillages, Settings, Help/support ticket

4. Accounts (accounts@itinium.co.uk)

- & Dashboard financial stats (tonnage, GP)
- & Jobs list with status/payment filters; search jobs
- & Job detail: enter/edit admin financials (CBL LME, transport cost), check GP calculates, generate an invoice
- & KPI Reporting: charts render; filter; export to PDF/print — check nothing overlaps the footer
- & LME Pricing: update LME lead price and FX rate; confirm battery values recalculate; generate summary invoice
- & Confirm no access to Clients, Schedule, or User management

5. Head Office Admin (admin@itinium.co.uk)

- & Everything Accounts can do, plus:
- & Clients: create, edit, and deactivate a client
- & Users: create users of every role; edit and deactivate a user
- & Schedule: calendar/Gantt view; drag-and-drop a job to reschedule; check the reschedule audit log records it
- & Correction Audit: verify AI-suggested corrections from depot form entries appear with accepted/rejected status
- & Job detail: resolve flagged battery rows (edit flagged serial/manufacturer/voltage values inline)
- & Global search in the header finds jobs/clients

6. Cross-cutting checks

- & Notifications bell shows alerts after relevant events (e.g. job submission)
- & Emails: password reset and any invoice/notification emails arrive
- & Browser refresh keeps you logged in; session expires cleanly on logout
- & Test on a mobile/narrow window — forms and tables remain usable
